

Leica TS13

A new standard for efficient surveying

The Leica TS13 total station provides a fast, reliable and efficient solution tailored to the users needs to measure and layout more points. Equipped with Automatic Target Recognition (ATR) technology and optionally with target lock and SpeedSearch to find and lock on to prisms quickly, it provides accurate measuring to targets. Combined with Leica Captivate field software, the TS13 offers the simplest and most productive way of coding and line work.
