

BLK360

BE ORIGINAL

The all-new Leica BLK360 breaks open the possibilities of reality capture. With unprecedented, best-in-class scanning speed, the BLK360 makes you faster.

LIGHTNING FAST SCANNING

A supercharged next-gen imaging laser scanner, the BLK360 captures a full scan with spherical images in only twenty seconds—over five times faster than the BLK360 G1.

COMPLETE DATA CAPTURE

With fast and agile in-field workflows, along with live feedback on your mobile device, you can be absolutely sure you've captured everything you need. VIS technology automatically combines your scans to speed up your workflow and help you make sure your datasets are complete.

IMMERSIVE DELIVERABLES

BLK360 data is highly valuable for so many uses—from AEC to VR. Easily transfer and work with data in your software ecosystem to create immersive and highly accurate deliverables. You can also upload BLK360 data to HxDR, our cloud-based data storage, visualization, and collaboration platform.

FAST CAPTURE

Full scan and spherical imagery in 20 seconds

HDR IMAGING

4 camera, 5-bracket, 13-megapixel

VIS SYSTEM

Combines scans automatically

MOBILE APP CONTROL

BLK Live App for scanner control and feedback

LEICA BLK AUTONOMY: BLK Autonomy makes reality capture fully autonomous, from laser scanning and data processing to the creation of high-quality deliverables and immersive experiences.
